Professional Summary

Full Stack Developer with **5+ years of experience** building enterprise applications, AI-powered platforms, healthcare solutions, e-commerce systems, and mobile applications. Skilled in **React.js, React Native, Next.js, JavaScript, TypeScript, Node.js, Express.js, Python, FastAPI, REST APIs, GraphQL, PostgreSQL, MySQL, MongoDB, AWS, Docker, Shopify, and WordPress**. Experienced in **AI/LLM integrations, RAG, third-party APIs, payment integrations, responsive UI, backend development, database design, deployment, and system integrations**.

Experience

IBM May 2024 – Sep 2026
Senior Developer *Gurgaon, India*

- Developed enterprise-grade web applications using **React.js, Node.js, Express.js, JavaScript, and MySQL**.
- Designed scalable RESTful APIs and optimized backend services for internal and client-facing applications.
- Integrated cloud-based services, authentication, and third-party APIs while ensuring secure and scalable architecture.
- Collaborated with cross-functional teams following Agile methodologies, participating in sprint planning, code reviews, and production deployments.

Areteminds Technology Pvt. Ltd. Feb 2023 – May 2024
Software Engineer *Bengaluru, India*

- Developed responsive web applications using **React.js, HTML5, CSS3, JavaScript, and Bootstrap**.
- Built and integrated RESTful APIs using **Node.js, Express.js, and MySQL** for dynamic business applications.
- Worked on frontend optimization, reusable components, and migration of legacy applications to modern technology stacks.
- Collaborated with designers, QA engineers, and backend developers to deliver features within Agile sprint cycles.

Linkquest Telecom South Africa (Pty) Ltd. Oct 2021 – Jan 2023
Associate Software Engineer *Remote*

- Developed mobile-first, responsive web applications using **React.js, JavaScript, HTML5, and CSS3**.
- Built reusable UI components and integrated REST APIs with MySQL-based backend services.
- Developed dashboards and analytics tools for telecom operations, improving usability and application performance.
- Optimized frontend rendering, debugged production issues, and ensured cross-browser compatibility.

Technical Skills

Frontend: React.js, React Native, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind, TypeScript, Material-UI, Bootstrap, Next.js
Backend: Node.js, Express.js, GraphQL, REST APIs, PHP, Microservices
Databases: MySQL, MongoDB, PostgreSQL
Testing & Principles: Jest, React Testing Library, Unit Testing, SOLID, Clean Code, basic TDD/BDD
Cloud/DevOps & Security: AWS (S3, Lambda – basic), Serverless (basic), CI/CD (basic), JWT Auth, OAuth
Tools & Platforms: Git, GitHub, JIRA, Postman, VS Code, Chrome DevTools, WordPress, WooCommerce

Education

Technocrats Institute of Technology Aug 2018 – Jul 2021
B.Tech in Electronics and Communication Engineering (ECE) *Bhopal, Madhya Pradesh*

Projects

Toyota Manufacturing Dashboard (IBM Client)
React.js, Node.js, Express.js, GraphQL, MongoDB, Docker

- Contributed to the development of enterprise manufacturing dashboards used for monitoring production workflows, operational KPIs, and factory performance in real time.
- Built reusable React.js components and integrated GraphQL and REST APIs to deliver dynamic dashboards with live production metrics.
- Collaborated with backend teams to optimize API communication, reducing dashboard response time and improving data visualization performance.

– Implemented responsive UI following enterprise coding standards, ensuring compatibility across desktop devices and internal production environments.
– Participated in Agile sprint planning, code reviews, testing, and production deployments for continuous feature releases.

IBM Enterprise Analytics Dashboard
React.js, GraphQL, Node.js, Recharts, IBM Cloud
– Developed enterprise analytics dashboards for monitoring business KPIs, operational metrics, and executive reports across global teams.
– Designed reusable visualization components using Recharts, enabling real-time reporting with interactive charts and performance insights.
– Integrated GraphQL services and optimized frontend rendering to improve dashboard responsiveness and reduce unnecessary API calls.
– Collaborated with cross-functional teams to build secure, scalable, and maintainable enterprise reporting solutions deployed on IBM Cloud.

Snapdeal E-Commerce Platform
React.js, JavaScript, HTML5, CSS3, REST APIs
– Enhanced customer-facing e-commerce modules by implementing new features, fixing production issues, and improving the shopping experience.
– Developed responsive product listing, product detail, cart, and checkout components using React.js while integrating RESTful APIs.
– Optimized page performance, state management, and component rendering to deliver faster load times and smoother user interactions.
– Worked closely with QA and backend teams to ensure seamless releases and production stability across multiple application updates.

Vendoo
React.js, TypeScript, Node.js, PostgreSQL, REST APIs, Redis, AWS, Marketplace APIs, AI Integration
– Multi-channel e-commerce management platform for resellers with product listing, bulk publishing, inventory management, sale detection, analytics, AI listing tools, and marketplace integrations.
– Contributed to building responsive dashboards, marketplace integrations, product workflows, and AI-powered listing features using React.js, TypeScript, and Node.js.
– Developed and integrated REST APIs for product, inventory, sales, and marketplace workflows with PostgreSQL and Redis for data management and performance optimization.
– Worked on AI-assisted listing capabilities including automated product content generation, data enrichment, and workflow automation for faster marketplace publishing.

Pixyle AI
React.js, TypeScript, Node.js, Python, FastAPI, PostgreSQL, REST APIs, Computer Vision, NLP, AWS
– AI-powered fashion product data platform that transforms product images into structured attributes, tags, descriptions, search data, and SEO-ready content for e-commerce catalogs.
– Contributed to developing the product interface, AI data workflows, API integrations, and tools for managing enriched fashion catalog data.
– Built and integrated frontend and backend workflows using React.js, TypeScript, Python, FastAPI, and PostgreSQL for processing and managing AI-generated product data.
– Worked with computer vision and NLP-powered workflows to support product attribute extraction, categorization, tagging, and automated catalog enrichment.

SEVENSTORE
React Native, TypeScript, Shopify, GraphQL, Stripe, Redux Toolkit, Firebase Analytics
– Premium fashion e-commerce mobile application featuring product discovery, curated collections, wishlists, exclusive drops, raffles, shopping, and streamlined checkout.
– Developed responsive mobile interfaces using React Native and TypeScript with reusable components and Redux Toolkit for efficient application state management.
– Integrated Shopify and GraphQL APIs for product catalogs, collections, customer workflows, and e-commerce operations.
– Implemented payment and analytics integrations using Stripe and Firebase Analytics to support secure checkout and user behavior tracking.
